FOREWORD

Coming to your desk in Synod's Centennial year, the 61st issue of the *Statistical Yearbook* will be of more than passing interest. Editors and executives of today, in surveying the development of Synod during its first century, will study this volume more thoroughly than they did earlier issues. Writers and speakers of tomorrow will consult this issue time and again as they seek to gauge the growth and progress of Synod during its second century. We therefore urge that this volume be assigned a permanent place on your library shelf, even after it has been succeeded by newer issues.

For quick orientation of what this volume offers we refer you to the "Table of Contents" on the next page. A new column was added in the "Parochial Reports" section as a supplement to "Adults Confirmed." It was felt that the latter column does not give us a complete picture of the successes scored in our missionary endeavors. Many adults are won for the Church each year without submitting to the rite of confirmation. The new column, "Total Number of Adults Won," enables us to include them in tallying accessions from without.

After a lapse of several years the language question was revived. The tabulation on page 146 will give you the latest information on the trend toward English. We also call attention to the new tabulation, "The Missouri Synod Clergy," on page 195, which classifies all ordained pastors in 14 groups according to the nature of their work. Those interested in the urban and rural aspect of our Synod will find the answer in "Miscellaneous Tabulations" on page 147, which also presents data on church attendance and congregational debts.

We are very grateful to some 3,000 brethren for their willing cooperation in returning their parochial report questionnaires. In the case of missing reports the last available figures were used in computing totals.

In conclusion — for successes scored, for gains registered, for improvements noted, let us give all glory to God alone. For losses sustained, for failures suffered, for opportunities wasted, let us humble ourselves before God, seek His pardon, and mend our ways. And let us not forget that though statistics are vital to the successful management of a church body and that Synod, like business corporations and governmental bureaus, cannot dispense with statistical calculations, this volume reflects the size and activities of a visible church body and is subject to all the foibles of human limitations in the form of omissions and inaccuracies. But the Chief Statistician of the invisible Church, the omniscent Lord above, makes no mistakes. No reports are missing on His desk. "The Lord knoweth them that are His." Their names are written in the Book of Life.

EXPLANATORY REMARKS

On District Parochial Reports

1. *Location.* — In the District Parochial Reports section, which begins on the next page, all stations are listed in their proper alphabetical order except in the case of *Filialen* (additional charges). The latter are listed with the main station (where pastor is resident) in order to present a better over-all picture of the work done in one parish. All stations not listed in their proper alphabetical order have been indented. The Station Index in the rear of the book shows with which station an additional charge is listed.

Consult the Station Index also if you cannot find a certain congregation. It may be listed under another name. Thus, in the Michigan District you will look in vain for Frankentrost, but the Index will tell you, "Frankentrost (See Bay City 8 W)."

2. *Visiting Circuit.* — The numbers used to designate the circuit are explained in the "Key" following each District's reports. This key designates the Visitor (as of May 1, 1947) and gives the official name of each circuit. Where Districts themselves are using numbers for their circuits, these have been retained, and the general area of the circuits' location is indicated.

3. *Names of Congregations.* — A dash in this column means that the respective place is not organized. Where a name exists before organization has taken place, such name has been placed immediately after the name of the city, space permitting.

4. *Pastor.* — Ditto marks beneath the pastors' names indicate the size of a parish at a glance.

5. *Year Organized.* — A dash means the place is unorganized if no voting members are recorded. If voting members are listed, a dash means that the year of organization is not known or was not reported.

6. *Parochial School, Enrollment.* — An asterisk placed before number of pupils indicates that congregation has no school of its own, but is formally affiliated with school of sister congregation or participates in a central school.

7. *Parochial School, Teachers.* — Plain numerals indicate regularly installed (men) teachers. In all other cases initials are used, viz., P = Pastor, L = Lady Teacher, S = Student, C = Candidate, and A (Brazil) = Man Lay Assistant. Thus, 3, 2L, C means three installed teachers, two women, and a candidate teach in that particular school.

8. *Total Number of Adults Won.* — A new column, which includes, in addition to adults baptized and confirmed, such as were gained by reclamation, profession of faith, etc.

9. *Language Used.* — Abbreviations used are:

E = English	It = Italian	P = Portuguese
G = German	Hu = Hungarian	La = Latvian
Sp = Spanish	Sl = Slovak	Li = Lithuanian
Po = Polish	Es = Estonian	Ch = Chinese

NOTE. — The list starts with 1881, although baptisms and confirmations of adults were also reported prior to this. In 1918 a special column was set aside for these reports, and the number of confirmed rose from 827 to 2,100, which showed that prior to this time not half the pastors had reported on this phase of their ministerial activity.

Station Index

The following list presents alphabetically the cities and communities in which Missouri Synod congregations and preaching stations are located, designates their District affiliation, and shows the number of the page on which the parish statistics may be found. In the case of *Filialen,* which in the *Parochial Reports* section are not listed in their proper alphabetical place, but follow immediately after the main congregation, the Index designates the station with which they are listed. Thus, *Abbotsford, Wis., w. Dorchester, NW-77* means that on page 77, North Wisconsin District, you will find Abbotsford, not in its proper alphabetical place, but immediately following Dorchester, with which it forms one parish.

By the use of cross references (in parentheses) the Index also helps you in determining under which name the reports of certain rural and suburban churches, which may be variously designated, are to be found. Thus, in the Michigan District section you will look in vain for Frankentrost, but the Index comes to your rescue by stating, *Frankentrost (See Saginaw 7 E).* There are more than 500 such *cross references.*
